

Tata Technologies Training

Highlights

- Three cost-effective training delivery methods that fit every budget and offer complete flexibility:
 - Live Classroom Learning
 - Live Web-based Learning
 - E-Learning
- Expertise with leading engineering, design, PLM, manufacturing, and enterprise software
- Customizable training to address specific business needs
- Certified Tata Technologies instructors with extensive real-world experience
- Private classes, customized classes and open enrollment classes

Training is one of the most important investments a company can make. Effective training helps professionals design better products, collaborate more effectively in teams, work faster using more efficient methods and infuse their daily work with innovation.

Tata Technologies educators are all certified in their respective competencies and as working professionals ensure that businesses quickly master real-world techniques and methodologies to inspire on-the-job excellence.

A Trio of Convenient Training Methods

Budgets, time constraints, varying technologies, geographic boundaries – all of these variables can become barriers to effective training for engineers. Tata Technologies turns these potential obstacles into non-issues by offering three convenient, cost-effective, highly flexible training methods. We provide better training

through:

Live Classroom Learning

Engineers benefit from face-to-face interactions during live classroom learning. Our instructors enhance the learning process by using hands-on training and tying real-life scenarios into their courses.

Live Web-based Learning

Our Web-based learning courses are led by certified Tata Technologies instructors, creating a virtual classroom. This training option eliminates the expense and distraction of travel, and classes are divided into half-day sessions to allow participants to work on other projects.

E-Learning with

iGET IT® is the world's most comprehensive Web-based engineering knowledge management system. *iGET IT* was developed by Tata Technologies to offer online MCAD/PLM training courses for engineers. *iGET IT* features an expansive array of more than 4,000 courses, 8,000 videos, 2,000 assessments, forums, blogs and tech tips – all indexed by the powerful built-in Google™ search engine. *iGET IT* also features a comprehensive learning management system (LMS) that enables businesses to securely capture and distribute intellectual property in a structured learning environment.

Types of Classes

Tata Technologies takes our goal to offer complete training flexibility one step further by offering four cost-effective class types:

Global Presence

Tata Technologies serves the major automotive and aerospace OEMs and their suppliers with an integrated workforce of 4,000 professionals in 14 countries, plus near-shore and offshore centers around the world. Contact us at one of our locations below:

North America Headquarters

41370 Bridge Street,
Novi, Michigan 48375-1302, USA
Tel: + 1 248 426 1482

Canada Tel: +1 519 944 0106

Mexico Tel: +52 (871) 7221920

Europe Headquarters

Prospect Way
London Luton Airport
Bedfordshire, LU2 9QH, UK
Tel: +44 (0) 1582 878750

Germany Tel: +49 (0) 711 789 09-0

France Tel: +33 (0)3 88 56 89 00

Ireland Tel: +35 3 1 500 6220

Netherlands Tel: + 31 (0) 30 634 637-0

Asia Pacific Headquarters

25 Rajiv Gandhi Infotech Park
Hinjewadi, Pune 411057, India
Tel: +91 20 6652 9090

Japan Tel: +81 (0) 80 3522 1789

Thailand Tel: +66 2 673 6502/7

International & Asia Pacific Headquarters

5 Shenton Way
UIC Building #22-08
Singapore 068808

Private Classes

Tata Technologies instructors conduct courses specifically for members of your organization either at your site or at a Tata Technologies training center.

Customized Classes

Our experienced teachers deliver customized training in any combination of tailored and official software materials. Businesses can choose to receive training at their location or at a Tata Technologies training site, and we also offer on-the-job training to maximize productivity at work.

Open Enrollment Classes

Our open enrollment classes take place at a Tata Technologies training center equipped with all hardware, software and training materials necessary for effective learning.

Mobile Training Unit (Autodesk only)

Our Autodesk instructors come to you if you can't make it to our certified training centers. We provide computers, software licenses and training materials for an all-inclusive learning experience.

Training Benefits

We clear the path for your professionals to quickly and easily learn the skills they need to excel in the workplace. Better decisions, better time to market, better product quality – these are the results our clients expect and receive from Tata Technologies training. Additional benefits include:

- Tata Technologies provides world-class training for the industry's leading PLM products, backed by the assurance that we have used the products we sell for more than two decades
- Our certified instructors impart clients with knowledge gained through hundreds of hours of teaching experience in their areas of expertise

- Our knowledgeable instructors are skilled at developing customized courses for your specific business needs
- Tata Technologies instructors boost training effectiveness by infusing courses with real-life industry knowledge and hands-on training
- *iGETIT* offers self-paced online learning so professionals can work around busy schedules to boost engineering knowledge

About Tata Technologies

Tata Technologies is a global leader in Engineering Services Outsourcing (ESO) and Product Development IT services to the global manufacturing industry. Our pragmatic approach to engineering and manufacturing processes delivers best-in-class solutions for PLM, Enterprise Resource Management (ERM) and Application Development and Maintenance (ADM) to the world's leading automotive and aerospace manufacturers and their suppliers.
