

Tata Technologies Teamcenter Solutions

Highlights

- Siemens Solution Partner
- Teamcenter® solutions configured to your specific design requirements
- Shortened learning curve through convenient, affordable training
- Full use of accelerated productivity features
- Pre-configured, customized and multi-CAD implementation options
- 24/7 HelpDesk and Web-based assistance with *i SUPPORT IT*

At the center of product design operations, where CAD data is shared across departments and is subject to countless revisions, it's crucial to track design changes and ensure that the most accurate data is being used – all in real time. The industry-leading product data management (PDM) solution is Teamcenter® from Siemens, and the better single-source provider of Teamcenter products, services, support and training is Tata Technologies.

Tata Technologies and Teamcenter Implementation Options

Tata Technologies offers complete flexibility with our Teamcenter implementations, whether you require an out-of-the-box solution or one tailored to meet your organization's unique data management needs.

Companies can choose from different implementation options – an “out of the box,” pre-configured **Deploy**, a “unique requirements” **Define & Deploy**, or a

Multi-CAD implementation. No matter the option chosen, engineers will be able to confidently use all of the Teamcenter features that lead to accelerated performance.

Deploy

This option provides an excellent foundation for basic CAD management capabilities, and is typically chosen by companies with smaller workgroups who need a quick rollout without substantial interruption of workflow. It includes:

- Electronic vaults to control revisions and security
- Product structure model links
- Pre-defined data model
- Standard design environment configurations
- Base foundation licenses and integration for authoring in NX, I-DEAS, CATIA, AutoCAD, Inventor or other supported CAD packages
- Sample use cases
- Standard training materials

BETTER DATA MANAGEMENT
BETTER WORKFLOW

“We had a long relationship with Tata Technologies and we always knew Tata Technologies was a great supporter of ours. ... we needed their combination of expertise and knowledge of both the solutions and our industry.”

Glenn Slonke, Littelfuse

877 668-8282 (TATA)

Global Presence

Tata Technologies serves the major automotive and aerospace OEMs and their suppliers with an integrated workforce of 4,000 professionals in 14 countries, plus near-shore and offshore centers around the world. Contact us at one of our locations below:

Define & Deploy

Companies that choose customized Teamcenter solutions usually have unique CAD management requirements to better manage complex processes and data. This option includes:

- Electronic vaults to control revisions and security
- Product structure model links
- Tata Technologies-designed data models
- Custom configurations
- Base foundation licenses and integration for authoring in NX, I-DEAS, CATIA, AutoCAD, Inventor or other supported CAD packages
- Custom use cases
- Tailored training options

Typical services that can be added to this option are:

- Pilots
- Data migration
- On-the-job training (OJT) and multiple-site implementations
- Customization or ERP integration in future phases

Multi-CAD

Tata Technologies deploys multiple CAD Manager applications to address situations with mixed CAD requirements. Additional software and services are available, including:

- Installation of additional CAD Managers with Teamcenter
- Configuration of each CAD Manager, and the appropriate visual data (JT) translators
- Training on each unique CAD Management interface
- OJT for each additional CAD Manager's unique capability
- Installation and configuration of several viewing options
- Data model extensions for custom CAD attribute mapping

Hardware and Network Configuration

No matter how powerful the PDM solution, points of failure can occur if the system isn't properly integrated with the right hardware and your network. Tata Technologies offers:

- A complete line of hardware options

with pre-defined specifications for PLM

- Network analysis and recommendations (optional)

Training

Tata Technologies' CAD and Teamcenter training expertise can be delivered to your organization through numerous options that meet your engineers' varying schedules and skill levels:

- Classroom
- On-the-Job Training (OJT)
- *iGETIT*® E-Learning

Global Support

We offer worldwide HelpDesk support and Web-based assistance from *i SUPPORT IT* to ensure that your Teamcenter solution is working correctly 24/7.

About Tata Technologies

Tata Technologies is a global leader in Engineering Services Outsourcing (ESO) and Product Development IT services to the global manufacturing industry. Our pragmatic approach to engineering and manufacturing processes delivers best-in-class solutions for PLM, Enterprise Resource Management (ERM) and Application Development and Maintenance (ADM) to the world's leading automotive and aerospace manufacturers and their suppliers.
