i CHECK IT®
BY TATA TECHNOLOGIES

AUTOMATED DESIGN CHECKING TO REDUCE ERRORS

Tata Technologies developed *i CHECK IT* – the ultimate quality assurance system that works like a spellchecker during the PLM design process – after years of seeing companies get caught up trying to simplify and standardize ways to correct design and data errors. *i CHECK IT* is part of the *i PRODUCTS* family which also includes *i COMPARE IT*, *i GET IT®* and *i SUPPORT IT*.

i CHECK IT automates the quality assurance and compliance process with hundreds of standard checks that help find design errors and provide suggested fixes. When *i CHECK IT* discovers an error, corrective action can be applied automatically or manually, giving the designer full control. *i CHECK IT* saves design teams valuable time by performing cumbersome, repetitive tasks on their behalf while also providing the opportunity to learn the correct design methodology by observing the automatic corrections. *i CHECK IT* is currently available for Autodesk® Inventor®, Dassault Systèmes CATIA V5 and PTC® Creo®.

i CHECK IT FOR AUTODESK INVENTOR
- Includes over 100 standard checks – all customizable
- Integrates with Autodesk Vault, allowing for control over designs being checked-in or -out based on their validation status

i CHECK IT FOR CATIA V5
- Includes over 330 standard checks – all customizable

i CHECK IT FOR PTC CREO
- A new product – includes a basic library of standard checks – all customizable

BENEFITS

Easy to install inside of Autodesk Inventor, CATIA or PTC Creo and it's just as easy to use!

The integrated interface makes it look and feel like the software tool you are using.

Automated quality assurance so that international teams can work with the same information.

Add custom checks to *i CHECK IT* with the AddOn Dictionary. Checks can be built and shared with external users, such as suppliers, to ensure they comply with specific processes and methodologies.

Get an interactive on-screen report of the results that can be exported into a PDF file.

ABOUT TATA TECHNOLOGIES

Tata Technologies, founded in 1989, enables ambitious manufacturing companies to design and build better products through engineering services outsourcing and the application of information technology to product development and manufacturing enterprise processes.

With more than 8,500 professionals, representing 28 nationalities, Tata Technologies focuses on the manufacturing industry – covering every aspect of the value chain from conceptualization, manufacturing, aftermarket and maintenance repair to overhaul support. Tata Technologies supports clients through engineering and research services outsourcing, product development, product lifecycle management, connected enterprise IT services, and technical workforce staffing, PLM software and training solutions.

Tata Technologies serves clients in 27 countries, with a delivery model specifically designed for engineering and IT engagements, offering a unique blend of deep, local expertise integrated with 16 global delivery centers across Europe, North America and Asia Pacific.
