

ENHANCING EFFICIENCIES. DRIVING RESULTS.

An Intelligent Approach Towards Delivering
An Enriched Customer Experience

 Engineering a *better world*.

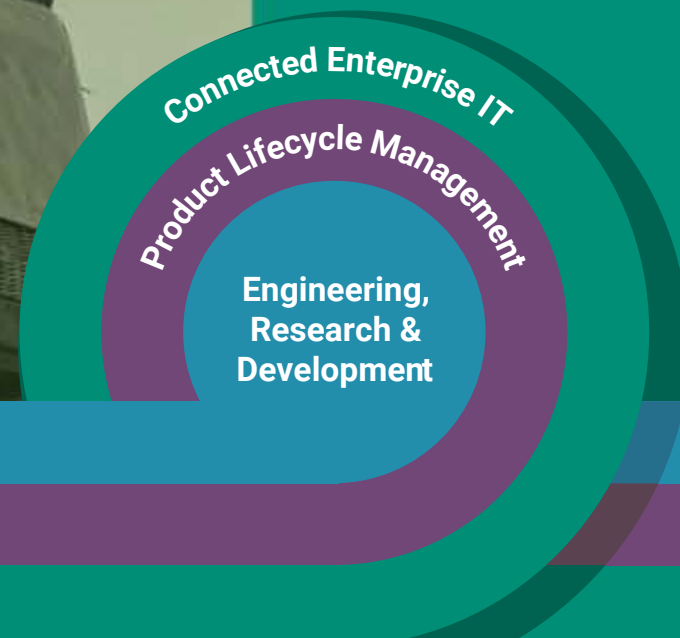

CUSTOMER
EXPERIENCE
MANAGEMENT

PRODUCT DEVELOPMENT IS AT THE CORE OF EVERYTHING WE DO

We empower our clients to make their product dreams a reality by designing, engineering, validating and industrializing better products.

Unlike any other organization in our sector, beyond engineering and product development, we've had the curiosity to pursue the optimization of end-to-end manufacturing. The result is a complete understanding of the benefits associated with the digitalization of modern manufacturing.

Architected well, the complete product realization lifecycle is a virtuous feedback loop designed to embrace the data that supports the continuous improvement of better products.

WHY TATA TECHNOLOGIES?

Tata Technologies leverages more than 25 years of cumulative knowledge and experience to help the world's leading manufacturers create great products and select, deploy and adopt the technologies that underpin the entire product realization lifecycle. Drawing on a combination of people, process and technology, we drive efficiencies and innovation to help our clients meet their design, engineering and production challenges.

CONNECTING THE MANUFACTURING ENTERPRISE

Tata Technologies' connected enterprise IT solutions enable businesses to optimize the application of technology for the manufacturing sector, removing critical data discontinuities and enabling a platform for the complete digitalization of modern manufacturing. Our vast experience with product development and manufacturing engineering helps provide enterprise-wide visibility of the key performance indicators for seamless manufacturing execution.

CONNECTED ENTERPRISE IT (CEIT) SOLUTIONS

- Enabling smart connected factories
- Delivering global solutions for digital manufacturing
- Extending the digital lifecycle into effective manufacturing with enterprise resource planning (ERP), manufacturing execution systems (MES), supply chain management (SCM), customer experience management (CXM), business analytics and intelligence (BA/BI), complemented by world-class application maintenance services (AMS)
- Other legacy IT systems

LEADING EDGE

Tata Technologies has worked with global companies in the automotive, aerospace and industrial heavy machinery industries for more than 25 years. This experience has enabled our specialized teams to manage and support the entire customer experience management (CXM) program for clients around the world. Our highly experienced practitioners improve operational efficiencies by providing cutting-edge CXM consulting and implementation solutions. We drive operational excellence by combining technology and domain expertise to implement solutions for complex problems, providing valuable information back to the client in real-time.

ENABLING BUSINESSES TO MANAGE EXPERIENCES ACROSS CUSTOMER TOUCH POINTS

In today's internet-driven global economy, businesses are struggling to differentiate themselves from the competition. Understanding and investing in the customer experience is a significant way to create a competitive advantage. In such a scenario, customer experience management (CXM) is more than just an organizational initiative to increase profit.

Good CXM capability helps reduce costs, waste, complaints and personnel stress while improving business relations,

reducing client churn rates and increasing the number of referrals; thereby making the overall organization's service flow more efficient and effective. Based on the challenging requirements of today's highly evolving marketplace, Tata Technologies provides *Better Solutions* through a unique business process, thus maximizing client satisfaction.

KEEPING PACE WITH RAPIDLY CHANGING CUSTOMER EXPECTATIONS

The customer experience is considered to be the focal point of any business strategy. It's imperative to understand the client through multiple perspectives, which drives the development of an appropriate plan to target the right client base, by empowering sales and channel partners to reach out to them.

The progression of steps in the customer lifecycle helps uncover key metrics that indicate the performance of the

client's business, of which service and client engagement are most important.

Upon successful implementation of the process, it contributes towards the accurate calculation of the customer lifecycle value in a suitable manner.

BETTER SOLUTIONS.
BETTER OUTCOMES.

Consulting and Architecture

- CXM Strategy and Product Evaluation
- Oracle® Siebel Implementation Roadmap
- Oracle Siebel Upgrade Plan Deployment and Roll-out Readiness
- Focus on Partner Channels
- Interactions Between Partner – Client Interface
- Interactions Between Partner – Brand
- Owner Interface Processes Provided the Context Sensitive Intelligence

Implementation Services

- Business Process Consulting
- Configuration and Customization
- Integration – Enterprise Information Management (EIM) and Enterprise Application Integration (EAI)
- Deep Real-time and Batch-oriented ERP Integrations
- Development of Data Sync Processes
- Data Cleaning and Data Loading
- Use of Service Oriented Architecture (SOA) Techniques
- End-user Training Development and Delivery

Upgrade and Release Management Services

- Business Process Consulting
- Evaluation Strategy and Planning
- Functional Upgrades
- Technical Upgrades
- Technical Services
- Training and User Change Management
- Go Live and Ongoing Support

Support Services

- Business Process Consulting
- 24x7 Support
- Level 1 Support Phone/Email
- Level 2 Support Services
- Level 3 Support, Root Cause Analysis (RCA)
- System Administration
- System Enhancements
- Report Development

Testing and Validation Services

- Business Process Consulting
- Test Strategy and Planning
- Testing Technologies Evaluation
- Test Plan Evaluation
- Test Execution
- Test Automation
- Leverage Hewlett Packard Enterprise Unified Functional Testing (UFT) for Oracle Siebel
- Load Runner for Oracle Siebel

Training and Roll-out Services

- Training Programs
- Data Collection and Migration
- Physical Roll-out
- Last Mile Support (Local-Zonal-Regional)

SERVICE OFFERINGS

OUR CUSTOMER EXPERIENCE MANAGEMENT SOLUTION FRAMEWORK

Our customer experience management (CXM) solutions ensure customers are given the highest priority. Integrating customer data with organizational systems, business applications are the key to optimizing the customer experience, allowing clients to make better decisions. We develop customized line of business applications to meet the organization's operational objectives and ensure quick and cost-effective implementation.

ACCELERATING PROGRESS. DRIVING RESULTS.

KEY DRIVERS TO SUCCESS

World's largest CXM/DMS implementer in the automotive sector

250+

Dedicated professionals in the CXM space

Trusted Oracle Gold partner

Proven implementation skills in leading technologies

First to implement DMS using Oracle Siebel technology

20,000+

Man-years of CXM/DMS implementation experience

Automotive domain expertise across the two-wheeler, passenger car, luxury car and commercial vehicle segments

Extensive experience in application roll-out

VALUE DELIVERED

Tata Technologies was instrumental in supporting this automotive giant by implementing a customized IT system that ensured synchronization between dealers and clients while ensuring customer satisfaction.

THE COMPANY

A Japanese public multinational manufacturer of automobiles, motorcycles and power equipment, that has been in business since 1959. The organization is also a renowned manufacturer of internal combustion engines and features among the top ten manufacturers in the world.

“

“We would like to congratulate the Tata Technologies team on achieving the milestone of roll-outs that were promised to us. This was all made possible with their sincere efforts. Together, our objective of successfully implementing the project looks promising.”

- Deputy Manager, Leading Japanese manufacturer of two-wheelers

”

THE CHALLENGE

The client suffered from a lack of synchronization between pivotal business units.

- ▶ Data sources were restricted, since there were only a select few warranty registered customers
- ▶ Rapidly expanding network of channel partners
- ▶ Important link with the customer was missing

THE SOLUTION

- ▶ Instrumental in creating an application that managed critical transactional elements
- ▶ Built an analytical application that complemented the transactional application created
- ▶ Implemented a pilot project with multiple dealers
- ▶ Incorporated critical feedback and actionable recommendations from the pilot project
- ▶ A distributed help desk management system was developed to facilitate a customer-centric approach to business

THE RESULTS

2 million+ vehicles serviced per month

Last mile inventory connectivity deduced

Nearly 450,000 vehicles sold per month

An expected 1,000 dealers to be added within the current set-up in the future
