

Case Study | Application Value Management

SMOOTH TRANSITION FROM LEGACY ENVIRONMENT TO NEW APPLICATIONS

TATA TECHNOLOGIES WAS INSTRUMENTAL IN SUPPORTING THE AUTOMAKER IN TRANSFERRING CRITICAL IT APPLICATIONS FROM THEIR PAST TO CURRENT BUSINESS ENVIRONMENT AND PROVIDING SEAMLESS APPLICATION MANAGEMENT SERVICES.

THE CHALLENGE

The client was interested in transferring all its business critical applications to a new business environment, yet, was faced with multiple challenges:

- Cloning of various applications pertaining to multiple domains
- All applications were using obsolete technologies
- A lot of applications were dependent on the past business environments
- Complex interfaces dealing with over a thousand applications
- Lack of test and development environments

THE COMPANY

A British multinational automotive company headquartered in the United Kingdom – a subsidiary of an Indian automaker. The company's principal activity involves design, development, manufacture and sale of their marquee luxury and off-road vehicles. The company is known for investing significantly in research and development.

THE SOLUTION

- Created a technically robust team for transitioning and supporting the client's applications
- Ensured strong documentation pertaining to testing, technical knowledge and interface application manual
- Operated as an integrated team along with the client's teams to maintain seamless business continuity
- The program was divided into four phases in concurrence with client - "Agree", "Prepare", "Deliver" and "Accept"

THE RESULT

More than 1000 applications were transferred and the technologies used were upgraded

Durable and long lasting system for the dealer community

Better support through the IT system

All applications were under the ambit of a single new business environment

ABOUT US

Tata Technologies is a global engineering and product development IT services company that is focused on fulfilling its mission of helping the world drive, fly, build and farm by enabling manufacturing companies across the automotive, aerospace and industrial heavy machinery verticals realize better products and drive efficiencies in their businesses. There are two components to our value proposition – managing and delivering outsourced engineering services and products for our manufacturing clients, and helping them identify and deploy technologies that are used to conceptualize, design, validate, build, test, benchmark and realize better products.
