

Case Study | Aerospace

TOTAL INTERIOR SEATING PROGRAMMES

THE COMPANY PARTNERED WITH TATA TECHNOLOGIES FOR A TOTAL INTERIOR SEATING PROGRAMME.

THE CHALLENGE

- Supporting design happened simultaneously on multiple airline programs across multiple sites.
- Responding quickly for ramp-up of offshore and onsite resources.
- Creating a flexi-skilled team in Enovia, CATIA V4, E3D, Patran, LS-Dyna, and Nastran.

THE COMPANY

The company is a world leader in aerospace equipment and systems on board commercial, regional and business aircraft as well as helicopters. They have 100 locations worldwide and 35,000 employees.

THE SOLUTION

Phase 1 – Onsite/offshore

- Establishment of a global delivery model combining onsite and offsite resources.
- Rotation of onsite and offshore teams so knowledge could be transferred.

Phase 2 – Schedules

- Adhered to the stringent schedules and quality norms.

Phase 3 – Issue resolution

- Communicated effectively to ensure the resolution of quick issues.

THE RESULT

Reported savings of >300k every year

Improved resource capacity, flexibility, competitive advantage

Sustained business growth over past 7 years

ABOUT US

Tata Technologies is a global engineering and product development IT services company that is focused on fulfilling its mission of helping the world drive, fly, build and farm by enabling manufacturing companies across the automotive, aerospace and industrial heavy machinery verticals realize better products and drive efficiencies in their businesses. There are two components to our value proposition – managing and delivering outsourced engineering services and products for our manufacturing clients, and helping them identify and deploy technologies that are used to conceptualize, design, validate, build, test, benchmark and realize better products.
